

How to Stop Development of the Canadian Tar Sands

When environmentalists discuss the proposed Keystone XL pipeline project, they often state that their real goal is to prevent Canada from developing the tar sands. Unless and until Canada becomes our 51st state, I have bad news for these folks: Canada is a sovereign nation. They have a government that is separate from the U.S. But, in the spirit of education, I offer a small video clip that will show them how to stop development of the Canadian tar sands.
