Susan Shelley
@Susan_Shelley

In response to the volcanic eruption, California lawmakers are considering a bill to spend $30 billion on research and consulting contracts to develop giant corks, declaring that California must show giant cork leadership. Governor announces travel boycott.

> **Steve Milloy** @JunkScience · 7h
> If you're doing anything to reduce your CO2 footprint, you've just been offset forever.
>
> nytimes.com/2023/05/22/wor...

Steve Milloy @JunkScience 8h

If you're doing anything to reduce your CO2 footprint, you've just been offset forever. https://www.nytimes.com/2023/05/22/world/americas/mexico-volcano-popocatepetl-eruption.html?smid=tw-share

Blokeonabike @Blokeonabike2 8h
Exactly 🎯

TCS @TCS110472092984 7h
There are also tens of thousands of active underwater volcanic vents in the depths of the oceans.

Fr0hickey @fr0hickey 8h
Ancient Incas sacrificed children and virgins to volcanoes.

Sir Paul Alves @StarshipAlves 7h
How many hundred years of carbon was produced as compared to human activity by this one event? Yet the climate fraud artists tell us if we keep driving our cars for 10 more years we will go extinct. 🤡

Polly ☀️🌳 @PollRackham 8h
So can we all have the day off from being guilt-tripped? 😄 Oh no wait - volcano eruptions are our fault.

Mark Swisher @markswisher 8h
Yep, we should have CO2 capturing equipment on every volcano by now.

> **Tommy Cockles** @TommyCockles8 6h
> Don't give them ideas.

Mil Spec @MilSpec0341 7h
It's only your fault if you are white.

HoyneEazy-E @hoyneeazy 7h
You're expecting this cult to use logic? Good one, lol

Ken Benson @kennybear72 6h

Dot @Dot2TrotBlog 7h
Anecdotal report: the growing season is taking way longer to heat up, and I'm hearing the same from other gardeners across the US. My money is on the Tonga volcano eruption last year - the biggest since Krakatoa...so of course, every article I find says it is going to increase...

> Dot @Dot2TrotBlog 6h
> Oh, and Krakatoa apparently caused one of the biggest rainy seasons on California 1883-1884...hmmm. what just happened in CA this winter & spring? Crop failures coming soon yet the "experts" will blame humans.
>
> > Mr Mustard @MrMusta10059358 5h
> > Wait a minute! How dare you use your own reason and common sense! Get in line heathen and subscribe to the doom!

MarcoSkeletorini @Mrskeletorini 8h
Bingo! Except if you talk to a climate clown they say it's different 😢🤣🤣🤣😢😆😆😆

> thinking_matters @climateaware00 8h
> We emit 100 x all volcanoes combined.
>
> > MarcoSkeletorini @Mrskeletorini 8h
> > What lol?? keep drinking that climate koolaid
> >
> > > thinking_matters @climateaware00 8h
> > > Volcanoes ate part of the natural carbon cycle. Its us burning all the hydrocarbons we can get, that's what isn't natural.
> > >
> > > > MarcoSkeletorini @Mrskeletorini 8h

Kurt Buehler @prolifrantivaxr 6h
Hopefully C02 increases, we are at historic lows, plants need more C02.

M K @Modster99 6h
Well, if they really wanted to help, they could stop breathing. . .

Pasha Mat @matjuhov 7h
All climate activists should glue themselves to the top of the mountain and show some protest

S_Bradley 🐂🦬 @SBradley9 7h
It's those 90 🌋 on Antarctica that keep me awake at night 🌃 😂 😆 "Mount Erebus is the most active volcano in Antarctica—and one of a few in the world with a permanent lake of molten lava in its crater."

RobCarson @Rob_Carson 7h
Etna is having a go too.

> Malachi O'Neill @MalachiONeill 7h
> And Canada with their fires.

wherryj @TVMADoc 6h
I certainly hope that someone will fine that volcano for overuse of carbon credits!

The Excommunicate ⚡ @AntePurgatorio 6h
You all realize that eating bugs, locking yourselves in 15 minute ghettos, and giving up your income to the government would have totally prevented these C02 emissions, right?

nomasteryoda is here @ilikegnus 6h
Exactly: Its not Human activity causing climate change.

Sotok.eth @purebloodtrue 7h
Exactly

Steve @Steve63619233 7h
if you think that is bad, how much radiation is flying around the planet after Russia destroyed the depleted uranium weapons provided by the globalists in UKR?

Fred Clark @JohnGalt_Who_Is 8h
Anyone that studies the effect the 1883 eruption of Krakatoa had on the world's climate for decades would realize how insignificant human activity is relative to major geologic events. As significant as volcanos are, a major solar flare could be much more catastrophic. Humankind...

Bill Marsh @USNA_73 8h
Can't get a read on the CO2 being emitted, only the Sulphur Dioxide (which is bad enough). Anyone have more information. I don't subscribe to NYT

BeerMan 🇺🇸 @TXBeerMan 6h
They should carbon tax that volcano. And why isn't there leading some childish protest against the volcano?

> **BlackArrow** @blackarrowxv 6h
> Because she's worried about actual problems.
>
> >
> **Humanity's emissions '100-times greater' than volcanoes**
> Human activity churns out up to 100 times more planet-warming carbon each year as all the volcanoes on Earth, says a decade-long study released Tuesday.
> https://phys.org/news/2019-10-humanity-emissions-times-greater-volcanoes.html

Not so. Wise owl @Doggnap 5h
Could we pop a few stop oil protestors in it and the gods will calm down for a few hundred years?

Nathaniel @Nathaniel1326 6h
But If I pay carbon offsets to governments... it's like volcanos don't even exist.

Joshua-029 @hammervol 6h
Everybody start breathing cow farts 😂

Jon Boyle @jonb6156 6h
I think Mt Etna is also erupting, but the CO2 is natural, not man made, so that's OK.

Deframing @Deframing1 7h
Thought about you and your conversation with...

Paul Roundy @PaulRoundy1 7h
You way overcount the net contribution of volcanoes over time, in comparison to human activities.

Beck @techno92 7h
I'm not so all's good👍
